Diane,

Good afternoon, I spoke with Gary this morning and he wants to move forward with shipping this waste offsite based on the data we currently have in hand. We will not be shipping you a sample for SVOC analysis. Thanks for your quick responses and attention to this matter, much appreciated.

Thanks again,

Beth Crawford

Beth,

We should be able to prep the sample as soon as you can get to us. I would guess it should be no more than a week to 10 days when we can get preliminary numbers to you. I have copied Christy who is in charge of all sample shipments and scheduling. Please direct all requests through her (281-983-2137). How quickly the sample can be shipped/delivered to us?

Thanks

Diane,

Based on our phone conversation today we are interested in having you run TCLP SVOC analysis on sample 4048-PT3. Currently I have five parameters we are carrying waste codes on due to MDL's. Those compounds are as follows: 1,4-Dichlorobenzene, Hexachloroethane, Hexachlorobutadiene, Nitrobenzene and 2,4,6-Trichlorophenol. If we can prove these compounds are not there above regulatory levels I can ship this waste as non-hazardous. Please double check with your staff and let

Gary and myself know if this is a service you think you can provide for us and the timeframe in which it would take to get it done. Once we have that information Gary and I can make a decision on how to proceed. Thanks for calling me back so quickly, much appreciated.

Thanks again,

Beth Crawford
